MISSION OF THE CONNECTICUT BREAST HEALTH INITIATIVE:

The Mission of The Connecticut Breast Health Initiative, Inc. is to make a difference locally in the fight against breast cancer through education and research.

To accomplish this, CT BHI, Inc.

- Is committed to the health of the women and families in CT.
- Funds a diversified portfolio of translational research.
 - Translational Research: process of applying ideas, insights and discoveries generated through basic scientific inquiry to the treatment and prevention of disease or injury. Its value is usually determined based on the likelihood that completion of exploratory or developmental research objectives will move towards effective therapies. TR is intended to translate knowledge derived from laboratory work (basic research) into clinical applications.
- Emphasizes programs that have not yet qualified for federal grants targeting cause and survival.
- Provides information on breast health and the importance of early detection.
- Is dedicated to the discovery of breast cancer prevention and quality of life research.
